## 1. INTRODUCTION

The Euronext Equity Index Membership product provides the full constituent list and identifiers for Euronext indices.

The index membership data is published three times a day in the form of two batches of End of Day (EOD) files and one batch of Next Day (NXTD):

- The EOD files carry index membership data effective on the day the data was published. The 1<sup>st</sup> batch carries EOD data for indices calculated in the European time zone and the 2<sup>nd</sup> batch carries EOD data for indices calculated in the US time zone and also all the data that was published in the 1<sup>st</sup> EOD batch.
- The NXTD files carry index membership data adjusted for changes.
