## 1. INTRODUCTION

---

The Euronext Index Membership product currently provides the full constituent list and identifiers for Euronext indices. The Oslo Børs equity indices will be included in the Euronext Index Membership product as of 30 November 2020.

The index membership data is published three times a day in the form of two batches of End of Day (EOD) files and one batch of Next Day (NXTD):

- The EOD files carry index membership data effective on the day the data was published. The 1<sup>st</sup> batch carries EOD data for indices calculated in the European time zone and the 2<sup>nd</sup> batch carries EOD data for indices calculated in the US time zone and also all the data that was published in the 1<sup>st</sup> EOD batch.
- The NXTD files carry index membership data adjusted for changes.

Please refer to the file named “Euronext Index Data Products - List of indices covered” available on <https://www.euronext.com/nl/market-data/products/end-day-index-data> for further information in respect to the index calculation time zone for each Euronext index.
