## 1. INTRODUCTION

---

This document provides all multicast addresses required to access the Euronext Optiq® Market Data Gateway External User Acceptance (EUA). Only shaped data is provided in the test environment. In order to ensure a Production-like test environment, separate IP addresses and ports are used to replicate the Production 'shaped' and 'unshaped' configuration.

The Euronext Optiq® Market Data Gateway Next Release-EUA (P-EUA) and the Current Release-EUA (V-EUA) environment are located in Bergamo. The P-EUA and V- EUA Source IP Address ranges are provided in this document and for P-EUA the Source IP Address ranges are provided for the live and standby systems as part of the High Availability mechanism. EUA High Availability (HA) and failover testing will only be conducted on the Next Release test environment (P-EUA).

Customers are requested to allow the V-EUA and P-EUA Source IP Address ranges through their Firewalls.

With the XML Standing Data files for the different Optiq Segments, customers will be able to map which instruments are available in which channel. The Optiq MDG feed configuration can be found at the end of each Standing Data file available and these will be provided on a daily basis in XML format. It is required to use the feed configuration details as part of the standing data files to connect to the feed on a daily basis.

In case a new partition is added to an Optiq Segment, customers are required to adapt to this type of change using the Optiq MDG Standing Data files that include the feed configuration details.

## 1.1 OPTIQ SEGMENTS, PARTITIONS AND MDG SET OF CHANNELS

Below you will find an overview of the available Optiq Segments, the number of partitions per Optiq Segment and the MDG Set Of Channels ID and Name that are part of each Optiq Segment. The Optiq Segments listed in the below table are also available in the real-time Standing Data (1007) messages and Contract Standing Data (1013) messages and also available in Standing Data files.

| Optiq Segment                       | Number of Partitions | MDG Set Of Channels ID | MDG Set Of Channels Name        |
|-------------------------------------|----------------------|------------------------|---------------------------------|
| 1. Equities                         | 4                    | 6                      | Equities Netherlands            |
|                                     |                      | 5                      | Equities France                 |
|                                     |                      | 7                      | Equities Belgium                |
|                                     |                      | 8                      | Equities Portugal               |
|                                     |                      | 9                      | Equities Dublin                 |
|                                     |                      | 10                     | Equities Norway                 |

## 1.2 CHANNEL TYPES AND CHANNEL IDS

The Channel Types and Channel ID's that are available to each customer depend on the available bandwidth on customer connections to the SFTI Network and the services that were selected in the SFTI® order form. Depending on the Asset Class, the following Optiq MDG channel types are made available to customers:

1. Pre-trade
  - a. BBBO – Best Bid and Offer
  - b. FBMU – Full Book using Market Update message (includes Best Bid and Best Offer)
  - c. FBOU – Full Book using Order Update message (includes Best Bid and Best Offer)
2. Post Trade – REFT – Reference Data and Full Trade Information
3. Indices – REFI – Reference Data and Index messages
4. Irish Bonds & Funds – IBFR - Irish Bonds & Funds Reference Data

Please read chapter **2.1 TYPE OF MARKET DATA CHANNELS** of the Euronext Cash and Derivatives Markets. – Optiq MDG Client Specifications for more details.

## 1.3 ADDITION OF A NEW PARTITION

The Channel ID contains 5 numbers and is provided as a field in the Optiq MDG packet header.

1. The first number on the left is used to identify if the channel is a real-time channel (3 for V-EUA and 5 for P-EUA) or snapshot (4 for V-EUA and 6 for P-EUA)
2. The second number is n= the partition number -1, with n=0 for the first partition, n=1 for the second partition, etc.
3. The last three number xxx represent the last numbers on the right used for the Multicast Group IP.

Each partition as part of an Optiq Segment has a Feed A and a Feed B and uses a unique Source IP address from the ranges as specified below:

| Feed A/B                            | Feed A          | Feed B            |
|-------------------------------------|-----------------|-------------------|
| Rendez-vous Point on Colocation     | 212.107.67.242  | 212.107.67.243    |
| Rendez-vous Point on CMC            | To be confirmed | To be confirmed   |
| Current EUA IP Address range        | 212.107.91.0/25 | 212.107.91.128/25 |
| Next EUA Primary IP Address range   | 212.107.90.0/25 | 212.107.90.128/25 |
| Next EUA Secondary IP Address range | 212.107.90.0/25 | 212.107.90.128/25 |

Customers are required to allow the whole range as specified above through their Firewalls to allow for the addition of a new partition within an Optiq Segment. In case of a new partition

1. A new Source IP will be used for the new partition, the Multicast Group IP Addresses for Feed A and B remain unchanged for the new partition
2. A new Channel ID is defined as 1(n)xxx and is equal to the ports used for the new partition.

The Multicast Group IP addresses for Real-time and Snapshot, for Feed A and B are:

| Environment | Channel ID | Real-Time/Snapshot | Multicast Group Feed A | Multicast Group Feed B |
|-------------|------------|--------------------|------------------------|------------------------|
| Current EUA | 3(n)xxx    | Real-Time          | 224.0.212.xxx          | 224.0.213.xxx          |
|             | 4(n)xxx    | Snapshot           |                        |                        |
| Next EUA    | 5(n)xxx    | Real-Time          |                        |                        |
|             | 6(n)xxx    | Snapshot           |                        |                        |
