PREFACE

PURPOSE

Euronext will be migrating Oslo Børs activities and instruments onto the Euronext Optiq® platform.

As a reminder, Migration scope will include:

- Transfer of **COB-Traded instruments related activities** from the current Millennium Exchange and SOLA systems onto the Euronext Optiq® platform (Cash and Derivatives).
- Transfer of **On-Exchange Off-Book activities / APA trades** from the current Millennium Exchange and SOLA systems onto the Saturn Euronext platform.
- Transfer of **Euronext Market Data tradable instruments and indices dissemination** from the current system to the Euronext Optiq® MDG (Market Data Gateway).

TARGET AUDIENCE

The intended audience of this document is any client intending to connect to and trade on the Oslo Børs markets using Optiq® and or Saturn OBOE features and or APA.

This document is for informational purposes only, and should be consulted alongside its associated documents outlined below.

WHAT'S NEW

The following lists only the most recent modification made to this revision/version. For the Document History table, refer to the summary of changes section.

REVISION NO./ VERSION NO.	DATE	AUTHOR	CHANGE DESCRIPTION

1. INTRODUCTION

Following Euronext's acquisition of Oslo Børs VPS Holding ASA in June 2019, Oslo Børs' trading systems, across asset classes, will migrate from the Millennium Exchange and SOLA systems to the Euronext Optiq® systems.

LCH SA will be appointed as the CCP providing post-trade services for the Derivatives Market and the current interoperability model in the Oslo Cash Equities Market will be continued with LCH Ltd, EuroCCP and SIX X-Clear. For fixed income bilateral settlement will be continued.

Optiq provides a single resilient route to Euronext pan-European Cash and Derivatives markets providing reliability, enhanced throughput and predictable latency for all asset classes. It delivers a simplified harmonized messaging model with maximum flexibility, within a single trading platform for Cash and Derivatives, providing clients with high performance and stability.

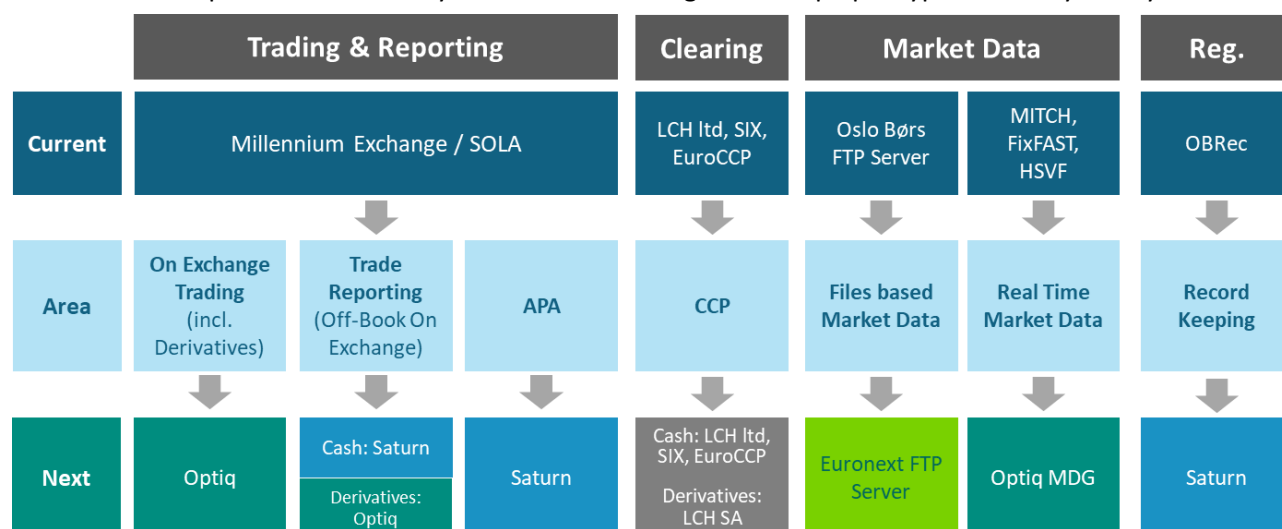

The move to Optiq has allowed Euronext to deliver an access model streamlined across markets, leveraging on its new leading edge technology. This simplified and flexible system allows shorter time-to-market for the delivery of new products and the implementation of customers' requests, while creating an opportunity for customers to reduce their administrative costs.

The migration of Oslo Børs to Euronext Optiq will allow clients to benefit from all the features provided by the platform through improved connectivity and protocols, and optimized messaging model.

The Cash Equities Go-live is scheduled for 9 November 2020 and Derivatives and Fixed Income Go-live is scheduled for 30 November 2020, both pending regulatory approval.

1.1 SCOPE OF OSLO BØRS MIGRATION

The table below provides a summary of the Oslo Børs migration scope per type of activity and system:

SCOPE OF MARKETS AND PRODUCTS COVERED BY OSLO BØRS MIGRATION

Markets and Products		
Cash Markets	Equities (OEG + MDG)	✓
	Funds (OEG + MDG)	✓
	Fixed Income (OEG + MDG)	✓

OSLO BØRS MIGRATION GUIDELINES

	Warrants & Certificates (OEG + MDG)	✓
	Indices (MDG only)	✓
Saturn OBOE	Equities / Fixed Income / ETFs	✓
Derivatives Markets	Equity Derivatives	✓
	Index Derivatives	✓
MiFID II Reporting Service	Approved Publication Arrangement (APA)	✓

SCOPE OF SERVICES COVERED BY OSLO BØRS MIGRATION

Services	
End of Day files	✓
Drop Copy	✓
Euronext File Server (EFS)	✓

2. OSLO BØRS MIGRATION DESCRIPTION

The Euronext Optiq Order Entry Gateway (OEG) provides high-speed and real-time connection to Euronext Cash and Derivatives markets. The system offers predictability, ultra-low latency, harmonized messaging protocol, high availability and scalability through a reliable network solution.

2.1 ORDER BOOK EXCHANGE TRADES

Optiq® OEG and MDG will involve some changes for the Oslo Børs migration. The Oslo Børs instruments will be migrated over to the different Euronext Cash and Derivatives Optiq segments.

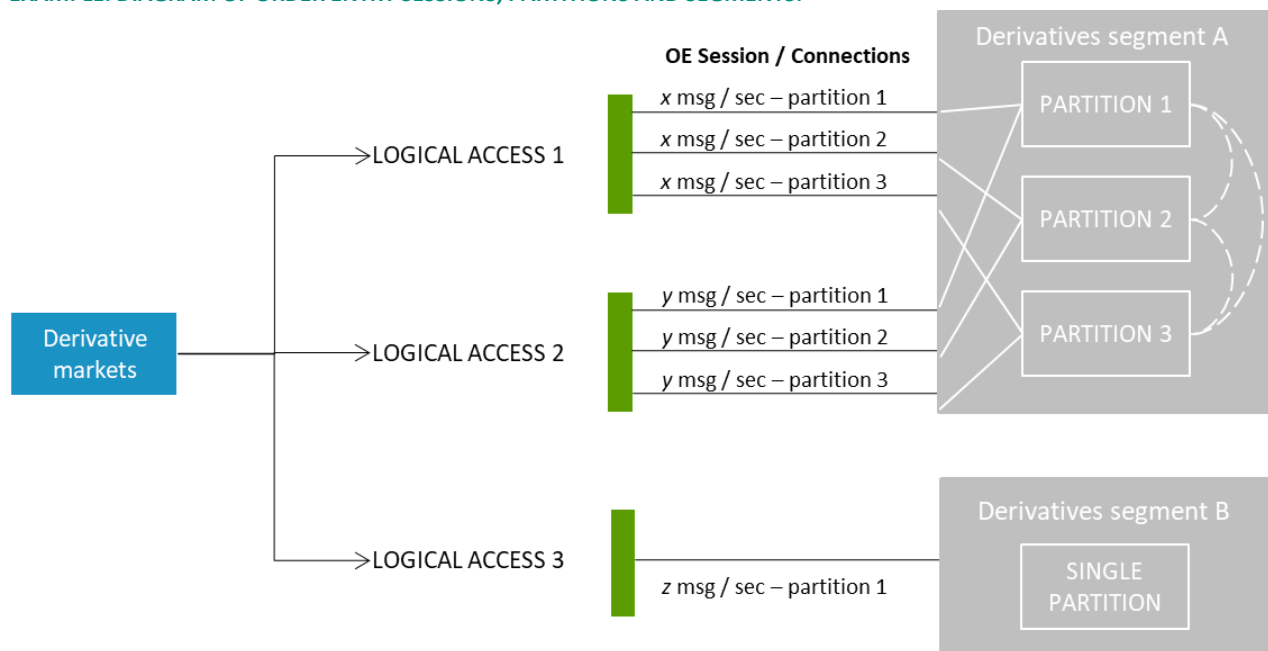

The list of instruments and their corresponding trading group/exchange, Optiq segment and partition will be available in the Appendix.

2.1.1 Connectivity Model

Euronext's connectivity model improves performance and stability by offering order entry sessions through Logical Accesses, which connect to dedicated partitions in individual Optiq segments.

- Each asset class is separated into an Optiq Segment.
 - ◆ Euronext Cash has five segments: Equities, Fixed Income, Funds, Warrants and Certificates, Euronext Block.
 - ◆ Euronext Derivatives have three segments: Commodities, Equity Derivatives, Index Derivatives.
- Each segment may be split into Partitions in order to benefit from improved performance and stability.
- To connect to a Partition, an Order Entry Session (OE Session) is required.
- OE Sessions are aggregated in a Logical Access for each segment.
 - With a Logical Access, customers are automatically given access to all Partitions within a segment.
 - Customers can choose to send an order to a Partition using the wrong OE Session and will be routed automatically. Latency is to be expected when using this route.
- One Logical Access can only apply to one segment. Using the same connection across multiple Optiq segments will not be possible.
- For Derivatives, all instruments of a single contract are available for trading in a single partition.

EXAMPLE: DIAGRAM OF ORDER ENTRY SESSIONS, PARTITIONS AND SEGMENTS:

Logical Access requirements are as follows:

- To send messages to an instrument hosted on any segment, the client requires a Logical Access on that specific segment. For instance, to send messages to an instrument hosted on the Equity Derivatives segment, the client requires a Logical Access on Equity Derivatives.
- The same Logical Access for a segment can be used to send orders to different Exchange Market Mechanism (EMM).
- Messages sent to an EMM can only be sent if the standing data contains the associated EMM for this book, i.e. EMM "1" (COB) and EMM "5" (TCS), etc.
- On Derivatives, logical Accesses are assigned a Functional Access Role. The list of such roles for Derivatives contains: Trading, Market Making, and RiskGuard.
 - ◆ Logical Access with role of Trading can send all private messages, except those associated to Market Maker Quotes, and RiskGuard.
 - ◆ To send Quote messages clients will require a Logical Access with role of Market Making. Such Logical Accesses can send any Trading and Market Making messages.
 - ◆ To send messages to an OEG for RiskGuard, clients will require a dedicated Logical Access setup for risk management purposes. Such Logical Accesses can send only messages associated to RiskGuard.
- On Cash, logical accesses can be configured with a Functional Access Role enabled for TCS and/or AFQ.

Drop Copy is provided as a separate service, for which a dedicated Drop Copy Logical Access is to be requested, and which has dedicated connectivity information. Drop Copy provides copies of trades and, at client's request, orders – Drop Copy Logical Accesses can be multi-segment.

Referential standing data is provided on a daily basis for each Instrument / Contract via MDG messages and files (available on Euronext File Service (EFS)), identifying which Optiq Segment and partition an instrument belongs to.

More details can be found in the *Euronext Markets – Optiq® File Specification* available in the [IT Documentation section](#).

2.1.2 Partitions and Instruments Mapping

Individual Optiq® Segments are comprised of one or several Optiq Partitions.

An Optiq® Partition is a technical subdivision of an Optiq Segment. Each Partition relies on an optimized technical environment, physically independent from one another, and connected via a routing system to other partitions within the segment.

The target number of partitions per segment are as follows:

Cash Optiq Segment	Number of Partitions
Equities	4
Fixed Income	1
Funds	1
Warrants & Certificates	1
Derivatives Optiq Segment	Number of Partitions
Equity Derivatives	3
Index Derivatives	1
Commodities	1

One Logical Access will give access to all Partitions belonging to the same Optiq Segment. For example, one Equity Derivatives Logical Access will be able to connect to each of the 3 Equity Derivatives partitions, using 3 OE Sessions.

Within the same Optiq segment, the load balancing process may result in instruments being assigned a different Partition, and as such different routing information, from one day to another. Due to this, clients are encouraged to plan developments to leverage this dynamic structure and to download and incorporate the standing data on a daily basis to ensure correct routing of their messages. For more information please refer to the OEG Message specifications.

All contracts and instruments for Euronext markets are uniquely defined by their Symbol Index. The Symbol Index is valid for the lifetime of the instrument and is used as the Optiq system-wide identifier. Both public and private messaging systems rely on this identification, which also allows for an easier reconciliation of public and private messages.

Together with the Symbol Index Optiq uses the *Exchange Market Mechanism* (EMM) to route messages to the correct trading platform. EMM represents the platform to which the order sent by the client must be routed. Information on Symbol Index and EMM values available in each Optiq segment is provided in the Standing data files, and a Symbol Index may be assigned multiple EMMs

Please refer to the *Euronext Markets - Optiq MDG Client Specifications* document for further details on standing data files.

2.1.3 Cash Equities On Book

The Oslo Børs Cash Equities markets will migrate to the Optiq platform and will use the current Euronext Cash Model.

The trading hours will follow what is already in place at Oslo Børs, with a closing at 16:20 CET.

The migration will bring a financial market, new exchanges and subsequent trading subscriptions.

The current interoperability model (using LCH LTD, EuroCCP, and SIX X-Clear) will remain.

Scheduled Group State	Equities Continuous matching	Schedule on half-days	Optiq phase
Closed	06:30 - 07:15	06:30 - 07:15	Closed
Pre-open	07:15 - 09:00	07:15 - 09:00	Call

- The Trading Manual & Appendix to the Trading Manual incorporating Oslo Cash changes are available on the [Regulation](#) page (under Organisation of Trading (EN) and Euronext Securities Markets)

2.1.4 Derivatives On Book

The Oslo Børs on-book derivatives trading will be migrated to Optiq. Important to note are the following:

- The CCP (Central Counter Party) for the derivatives market will change from SIX X-Clear to LCH SA.
- Single stock forwards and tailor-made products will be discontinued and therefore will no longer be available for on-book trading.
- The Oslo Børs trading calendar will be maintained. After the migration to Optiq, the Oslo Børs derivatives will remain to be closed on the following days:
 - New Year's Day
 - Wednesday before Easter (half trading day);
 - Maundy Thursday;

OSLO BØRS MIGRATION GUIDELINES

- Good Friday;
 - Easter Monday;
 - Labour Day;
 - Constitution Day;
 - Ascension Day;
 - Whit Monday;
 - Christmas Eve;
 - Christmas Day;
 - Boxing Day.
 - New Year's Eve
- The Oslo Børs trading hours will be maintained. After the migration to Optiq, the Oslo Børs derivatives contracts will be open for on-book trading from 09:01 CET – 16:20 CET. In more detail, the trading patterns will be the following:

Scheduled Group State	Regular trading session	Half day trading session	Optiq phase
Start of Consultation (members can delete orders)	06:30	06:30	Closed
Pre-open	07:15 - 09:00	07:15 - 09:00	Call
Uncrossing	09:01	09:01	Uncrossing
Continuous Trading	09:01 - 16:20	09:01 - 13:00	Continuous
Surveillance Intervention (members can delete orders)	16:20 – 22:30	13:00 – 22:30	Closed
End of Consultation (members can no longer delete orders)	22:30	22:30	Inaccessible

- Deferred publication will not be available in Optiq.
- The OBOSX index futures will not be migrated to Optiq.
- At or after the migration, stock futures with cash settlement will be listed (next to the physically settled stock futures that will be migrated to Optiq). Planning is dependent on LCH SA risk governance and regulatory approvals.
- After the migration to Optiq, variation margins and premium amounts will be settled by LCH SA on the first trading day after the trading date (T+1), whereas these are currently settled by SIX X-Clear on the second trading day after the trading date (T+2). Stock settlement, when applicable, remains to be on the second trading day after exercise.
- Shortly after the migration, Single Stock Dividend Futures (SSDFs) will be listed. The two SSDF contracts that are already listed on the Amsterdam derivatives market, i.e. the SSDF on Equinor and the SSDF on Telenor, will then be moved to the Oslo segment.
- The Derivatives Contract specifications can be found on the [IT Documentation](#) page.

2.1.5 Fixed Income On Book

The Oslo Børs Fixed Income market will migrate to the Optiq and the market model will to a large extent correspond to current Oslo Børs market model except that functionality for request-for-quote and issuing & buyback auctions will be discontinued.

- The Oslo Børs trading calendar and trading hours will be continued. In more detail, the trading patterns will be the following for bonds available for trading on Oslo Børs:

Bonds traded by continuous matching:

Scheduled Group State	Bonds traded by continuous matching	Schedule on half-days	Optiq phase
Closed	06:30 - 07:15	06:30 - 07:15	Closed (cancel only allowed)
Pre-open	07:15 - 09:00	07:15 - 09:00	Call (order entry/cancel/modify enabled)
Uncrossing (random)	09:00	09:00	Uncrossing (order entry/cancel/modify enabled)
Continuous Trading	09:00 - 16:00	09:00 – 12:00	Continuous (order entry/cancel/modify enabled)
Closed	16:00	12:00	Closed (cancel only allowed)
Inaccessible	18:30	18:30	Inaccessible (order entry/cancel/modify disabled)

Bonds traded by double calls:

Scheduled Group State	Bonds traded by auctions only	Schedule on half-days	Optiq phase
Closed	06:30 - 07:15	06:30 - 07:15	Closed (cancel only allowed)
Pre-open	07:15 - 09:00	07:15 - 09:00	Call (order entry/cancel/modify enabled)
Uncrossing (random)	09:00	09:00	Uncrossing (order entry/cancel/modify enabled)
Call	09:00 - 16:00	09:00 - 12:00	Call (order entry/cancel/modify enabled)
Uncrossing	16:00	12:00	Uncrossing (order entry/cancel/modify enabled)
Closed	16:00	12:00	Closed (cancel only allowed)
Inaccessible	18:30	18:30	Inaccessible (order entry/cancel/modify disabled)

Bonds traded by bulletin book functionality (no matching functionality)

Scheduled Group State	Bonds traded by bulletin book	Schedule on half-days	Optiq phase
Closed	06:30 – 09:00	06:30 – 09:00	Closed (cancel only allowed)
Call	09:00 – 16:00	09:00 – 12:00	Call (order entry/cancel/modify enabled)
Closed	16:00	12:00	Closed (cancel only allowed)
Inaccessible	18:30	18:30	Inaccessible (order entry/cancel/modify disabled)

- Additional order types will be introduced to correspond with existing Optiq functionality. For more details, please see “Trading Manual for the Optiq Trading Platform” available on [Euronext customer portal](#).
- For tick size, current model will be continued.
- Bilateral settlement will be continued.

- Please note that bonds registered on Nordic ABM will not be available in Optiq. These bonds will only be available for trade reports (OBOE and APA) and will thus only be available in Saturn
- Yield for orders and trades will be discontinued.

2.2 OFF-BOOK ON-EXCHANGE TRADE REPORTING

Trade reporting for Cash, including Fixed Income, will be possible through the existing Euronext Saturn solution. The Saturn OBOE service is currently used only by Dublin market but will be enhanced to support Oslo Børs instruments.

For Derivatives trade reporting will be possible through the Large-in-Scale trading facility.

2.2.1 Cash Equities Off-Book

The Cash Equities Off-Book On Exchange will be possible via the Euronext Saturn solution.

2.2.2 Derivatives Off-Book

After the migration to Optiq, on-exchange derivatives trading will be possible via the Large-in-Scale (LiS) trading facility that is available in Optiq. Important to note are the following:

- The CCP (Central Counter Party) for the derivatives market will change from SIX X-Clear to LCH SA.
- Single stock forwards and tailor-made products will be discontinued and therefore will no longer be available for off-book on-exchange trading.
- The Oslo Børs trading calendar will be maintained. After the migration to Optiq, the Oslo Børs derivatives will remain to be closed on the following days:
 - New Year’s Day
 - Wednesday before Easter (half trading day);
 - Maundy Thursday;
 - Good Friday;
 - Easter Monday;
 - Labour Day;
 - Constitution Day;
 - Ascension Day;
 - Whit Monday;
 - Christmas Eve;
 - Christmas Day;
 - Boxing Day;
 - New Year’s Eve
- After the migration to Optiq, the Oslo Børs derivatives contracts will be open for off-book on-exchange trading from 07:15 CET – 18:30 CET.
- Deferred publication will not be available in Optiq.

- The OBOSX index futures will not be migrated to Optiq.
- At or after the migration, stock futures with cash settlement will be listed (next to the physically settled stock futures that will be migrated to Optiq). Planning is dependent on LCH SA risk governance and regulatory approvals.
- Oslo Børs Market Place Services (MPS) will be discontinued.
- After the migration to Optiq, variation margins and premium amounts will be settled by LCH SA on the first trading day after the trading date (T+1), whereas these are currently settled by SIX X-Clear on the second trading day after the trading date (T+2). Stock settlement, when applicable, remains to be on the second trading day after exercise.
- Shortly after the migration, Single Stock Dividend Futures (SSDFs) will be listed. The two SSDF contracts that are already listed on the Amsterdam derivatives market, i.e. the SSDF on Equinor and the SSDF on Telenor, will then be moved to the Oslo segment.
- The Derivatives Contract specifications can be found on the [IT Documentation](#) page.

2.2.3 Fixed Income Off-Book

Reporting of on exchange off book trades (OBOE) will be possible through the Euronext Saturn solution.

In addition to the functionality already available in Saturn, the following will be added:

- Trade types:
 - Ordinary trade (O) will change to OT
 - The following trade types will be added:
 - Non-standard settlement (ON)
 - Other (OH)
 - Repo (RE)
 - Exchange granted trade (OE)
 - Odd lot (OL)
 - Not to Market (NM)
 - Package transaction (OP)
 - Please note that the same trade types will be used for both trades having immediate publications and trades having deferred publication
- Settlement dates: for each trade, settlement date may be specified. For repo-trades, both settlement date and buyback date will be added in the same trade message.
- Deferred publication (at choice by member on a trade-by-trade basis):
 - For illiquid bonds: possible with no minimum volume requirement
 - For liquid bonds:
 - Deferral is possible if the trade satisfies criteria in RTS 2 for post-trade SSTI
 - Deferral is possible if the trade satisfies criteria in RTS 2 for Post-trade LIS
 - Package trades: possible with no volume requirement
 - Whether a bond is defined as illiquid or liquid follows the criteria in RTS 2 and as published by ESMA
 - Trades accepted as being deferred will be published at 16:00 on T+0 (provided the trade is marked with “Deferral Indicator”= 5 – Deferral (Oslo))
 - Indefinite deferral for government bonds will be discontinued

Yield for trade reports will be discontinued.

2.3 APA

Trade Reporting for Cash, including Fixed Income, both Off-Book On Exchange (OBOE) or via the Euronext APA, will be possible through the Euronext Saturn solution. The Oslo Børs APA service will be discontinued as of 9 November for Equities and 30 November for Derivatives and Fixed income.

Members who would like to use the Euronext APA service, will need to sign the agreement for this. For further information, please contact TechnologySolutions@euronext.com.

2.4 POST TRADE OPERATIONS

The Oslo Børs Cash Equities Market will continue the current interoperability model for cash clearing with the three existing Central Counterparts (CCPs): LCH Limited, EuroCCP and SIX x-clear .

The CCP for the Oslo Børs Derivatives Market will change from SIX x-clear to LCH SA, encompassing the underlying physical delivery management further to option exercise/assignment and future tendering. Clearing onboarding to LCH SA (direct or via GCM) is mandatory. Electronic trading access will be required to trade the Oslo Børs Derivatives Market. Single Stock Forwards and Tailor-Made products will be discontinued, while the Single Stock Futures offering is expected to be expanded to more underlying shares.

Trading members must ensure they have valid clearing arrangements with a clearing member on Euronext Cash and/or Derivatives markets (where applicable) in order to be authorized to trade on Oslo Børs Markets.

For Oslo Børs fixed income, bilateral settlement will be continued.

2.4.1 Cash Equities Post Trade Operations

Current interoperable CCPs – LCH Ltd, EuroCCP and SIX x-clear – will continue providing clearing services to Oslo Børs Cash equities markets. The clearing system of interoperable CCPs will remain unchanged for clearing members with the migration to Euronext systems.

The CSD VPS will remain the provider of the central securities depository services for Oslo Børs securities. The VPS electronic settlement system will also remain unchanged for both CCPs and settlement agents with the migration to Euronext systems.

Clearing members of Oslo Børs clients are already clearing members of interoperable CCPs and therefore used to provide clearing services on Oslo Børs securities, including settlement with VPS.

For the above reasons, no impact and no regression are expected with the migration towards:

- Clearing members as they will keep their current CCPs and clearing services identical, and,
- Settlement agents with regards to the whole services provided by the CSD VPS.

Therefore, end to end tests from trading to clearing and settlement will not be mandatory, but only optional.

Current production set up of trading members, their relationship with clearing members as well as interoperable links with CCPs will be duplicated in Euronext systems for testing purposes unless trading members confirm Euronext to apply specific membership changes as a target for the migration.

Euronext will apply a freeze period to control trading and clearing membership changes a couple of weeks prior and after the migration to Euronext systems in order to secure and bring business continuity stability during the migration. More details will be communicated in due course.

For any further complementary information about the migration with current interoperable CCPs and CSD, please visit following websites or contact your CCP/CSD relationship managers:

- [LCH Ltd website](#),
- [EuroCCP website](#),

- [SIX x-clear website](#),
- [VPS website](#)

2.4.2 Derivatives Post Trade Operations

LCH SA will act the CCP providing clearing services to Oslo Børs derivatives markets instead of SIX x-clear. LCH SA clearing system is connected to Euronext systems and will adjust to some specificities of the Oslo Børs derivatives market, e.g. the physical delivery of Single Stock Futures.

Due to the change of CCP, the trading member must ensure he has valid clearing arrangements with a clearing member, in order to be authorized to trade on Oslo Børs derivatives markets. For this purpose, Euronext will require the trading member to liaise with his Clearing Member and confirm such details during the on boarding process.

Clearing members requiring a new membership with LCH SA will need to apply for [clearing member status](#) and complete onboarding process. End to end tests from trading to clearing will be mandatory for new trading and clearing members.

Trading members and their relationship with clearing members will be set up in Euronext systems for testing purposes so that to validate their readiness for the migration.

LCH SA has communicated following eligibility conditions and deadlines to migrate within current go-live objective of 30th November during the clearing Technical User Group of 1st September:

1. By 1st September:
 - Decision about being or not a clearing member should have been made
 - Technical connectivity solution should have been selected and signed
2. By 15 September:
 - Existing members should have authorized the CCP SIX x-clear to transfer account details to LCH SA (Letter of Consent)
 - Members should have defined:
 - Their account structures
 - Their payment solution: direct/indirect set up in Target2 (EUR) and NorgesBank (NOK), including a Power of Attorney
 - Their settlement solution
3. By 15 October:
 - Non clearing members / trading members should have decided and confirmed their target clearing broker for the migration

Euronext will apply a freeze period to control trading and clearing membership changes a couple of weeks prior and after the migration to Euronext systems in order to secure and bring business continuity stability during the migration. More details will be communicated in due course.

For any further complementary information about the migration with LCH SA, please visit following [LCH SA website](#) or contact your LCH SA relationship manager.

2.5 MARKET DATA AND INDICES

Oslo Børs Market Data will be migrated from the Millennium feed and the SOLA HSVF feed to Optiq MDG (Market Data Gateway).

OSLO BØRS MIGRATION GUIDELINES

Oslo Børs members, ISVs, data vendors that do not yet have Euronext data and wish to connect directly to Optiq MDG will need to order a SFTI connection. Clients that already have a SFTI connection will need to update their SFTI order form to access the new Oslo Børs Equities and Nordic ABM channels.

All clients that would like to receive market data in a feed format, either direct via SFTI or indirect via an ASP, ESP or data vendor need to sign a Euronext Market Data Agreement to license for the data. The EMDA documents can be found [here](#).

Oslo Equity and Bond Indices will be migrated to the Euronext Optiq® platform per 9 November 2020. Please note that the Oslo Core and Specialized Bond Indices will be discontinued per 28 November 2020. All sectorial indices currently based on the GICS classification system will be delisted. New indices will be launched, on the basis of the ICB classification system. Indices will be launched on industry level only.

Changes to the publication frequency of some indices and the methodology will also apply. For more information see paragraph 2.5.4.

2.5.1 Real Time Market Data

Oslo Børs Market Data will be migrated from the Millennium feeds MITCH and FIX/FAST and the SOLA HSVF feed to the Optiq® Market Data Gateway (MDG).

See paragraph 2.5.2 for the Market Data Channel set up and Paragraph 3.3.1 on how to arrange direct connectivity for production.

Euronext will migrate Oslo Børs market data clients onto Euronext's market data licensing agreements, integrating Oslo Børs market data into Euronext's commercial model effective 1 July 2020. Clients that wish to have or retain access to, and license for, Oslo Børs market data must execute, or update, the Euronext Market Data Agreement (EMDA). The Documentation can be found [here](#).

2.5.2 Optiq® MDG Channels

New Market Data Channels will be created for Oslo Equities and Nordic ABM. Other Oslo Børs data will be disseminated via existing Euronext Optiq® channels:

Optiq® Segment	MDG Set Of Channels ID	MDG Set Of Channels Name	Impact
1 – Equities	6	Equities Netherlands	No change
	5	Equities France	No change
	7	Equities Belgium	No change
	8	Equities Portugal	No change
	9	Equities Dublin	No change
	10	Equities Norway	NEW
	11	Best of Book (RMF)	
2 – Funds	1	All Funds	Oslo ETFs will be added to existing channels
3 – Fixed Income	2	Fixed Income	Oslo Fixed Income regulated market will be added to existing channels
	12	Fixed Income Nordic ABM	NEW
4 – Warrants and Certificates	4	Warrants and Certificates	Oslo Warrants and Certificates and Oslo ETNs will be added to existing channels
9 – Indices	13	Euronext Indices	Oslo Equity and Bond Indices will be added to existing channels per 9 Nov 2020. Oslo

OSLO BØRS MIGRATION GUIDELINES

			Bond Indices will be delisted per 28 Nov 2020
	14	Euronext iNAVs	Oslo iNAVs will be added to existing channels
	15	Euronext Dublin Indices	No change
10 – Trade Reporting and Publication	29	APA SI Quotes	Oslo Børs APA service will be discontinued. Euronext APA data will be available in this channel
	30	APA Trade Publication	Oslo Børs APA service will be discontinued. Euronext APA data will be available in this channel
11 – Index Derivatives	23	Index Options France	No change
	24	Index Options Netherlands	No change
	25	Index Derivatives Other	Oslo Index Derivatives will be added to existing channels
	26	Index Futures France	No change
	27	Index Futures Netherlands	No change
12 – Equity Derivatives	20	Equity Derivatives France	No change
	21	Equity Derivatives Netherlands	No change
	22	Equity Derivatives Other	Oslo Equity Derivatives will be added to existing channels
14 – Euronext Block	33	Euronext Block	

Oslo Børs APA trades are in Millennium/SOLA distinguished from on-exchange trades using the VenueOfExecution/ExecutionVenue field (Value is 'SINT' or 'XOFF' for APA trades). In Optiq® MDG Euronext APA trades will be published in dedicated (Euronext existing) Optiq® MDG channels, see Optiq® segment 10 – Trade Reporting and Publication.

Please see *Euronext Markets - Optiq MDG Client Specifications* and *Euronext Optiq® Market Data Gateway Production Environment* documents for further details.

2.5.3 Files Based Market Data

Effective on the OPTIQ migration dates, a number of changes will be introduced to the Oslo Børs file based Market Data products.

Clients can find a full overview of the changes to the different Oslo Børs Market Data products here:

https://www.oslobors.no/ob_eng/Oslo-Boers/Products-and-services/Market-data

Participant Trading Data files for members (excluding the All Bond PTD file) will be decommissioned. Trading Members are invited to migrate to Euronext File Services (see also paragraph 3.1.5.3).

Euronext offers two kind of FTP servers:

- *EFS (efs.euronext.com) – which provides files necessary for Euronext's customers to get access to the core trading chain of Euronext*
- *Market Data FTP (<ftp.data.euronext.com>) – where commercial market data products are delivered*

2.5.4 Oslo Indices

Oslo Equity and Bond Indices will be migrated to the Euronext Optiq® platform per 9 November 2020. The Oslo Børs Core and Specialized Bond Indices will be discontinued per 28 November 2020.

Following the migration of Oslo Børs Indices towards Euronext, all sectorial indices currently based on the GICS classification system will be delisted. New indices will be launched on the basis of the ICB classification system and industry level only (ICB level 1). Historical performance of sectorial indices will be based on the previous sectorial indices (GICS Level 1). An overview of the link between the old and the new sectorial indices can be found online: [Datafeed names and historical data for Sectorial Indices](#)

See the Appendix 7.3 for a list of indices to be migrated.

Indices will be published by Euronext either every 15 seconds or every second

For indices that are published on a every second basis, in case the index level does not change compared to the previously broadcast message no new message will be disseminated. There will be at least one message every 15 seconds.

The publication frequency of each index can be found in the List of Indices in Appendix 7.3.

The current computed VWAP attribute of the Oslo Børs Indices, which is based on the VWAP of the Index constituents, will no longer be published as a separate index (OBXW). Instead, the end of day VWAP price will be disseminated via the *Real Time Index message (1008, field 'Index Level Type'=7) and Index Summary (1011 field 'Liquidation Level')* of MDG around 16:30 CET and at 18:00 CET.

Find below a short overview:

Index	Mnemo	ISIN code	Real Time message	Summary message
OBX Price Index	OBXP	NO0007035376	16:30 CET and at 18:00 CET	18:00 CET
OBX Total Return Index	OBX	NO0000000021	16:30 CET and at 18:00 CET	18:00 CET

Euronext has consulted changes to be made as part of the migration of Oslo Børs equity indices towards the Euronext Optiq® platform. The scope of the consultation included changes to the portfolio of the indices that will be calculated as well as the main changes to the methodology of the indices. The full consultation paper can be found online: [Oslo Børs Equity Indices consultation summary](#).

Updated index rulebooks can be found online: <https://live.euronext.com/en/products-indices/index-rules>.

2.5.4.1 Oslo Derivatives Exchange Delivery Settlement Price (EDSP)

Please be informed that the Exchange Delivery Settlement Price (EDSP) of Index Derivatives that follow the OBX Total Return index (mnemo OBX) will be published every 3d Friday of the month via the *Real Time Index message (1008) and Index Summary (1011)* in the market data feed (MDG) around 16:30 CET and at 18:00 CET.

2.6 RECORD KEEPING

The current Oslo Børs Record Keeping service will be discontinued following the migration of the Oslo Børs markets to Optiq®. It will be replaced by the existing Euronext Saturn solution named SLC manager. See [Short Long Code Management \(SLC Manager\)](#) for further details.

2.7 PRIIPS KIDS REGULATION FOR DERIVATIVES

2.7.1 Introduction

The PRIIPs (Packaged Retail and Insurance-based Investment Products) regulation, applicable since 1 January 2018, enables retail investors to better understand and compare investment opportunities by providing them with a Key Information Document (KID) for every packaged product in which they wish to invest. A KID allows retail investors to compare the key features, risks, rewards and costs of different investment products. The regulation applies to packaged retail investment products, including investments in derivatives listed on Euronext regulated markets. Brokers will have an obligation to provide these KIDs to their clients.

2.7.2 Euronext PRIIPs KIDs offering for Oslo Børs derivatives

For Oslo Børs derivatives products, Euronext will provide six KIDs, one for each of long futures, short futures, long call options, short call options, long put options, and short put options. These documents [will be made available as PDF documents on the Euronext.com website, on two different levels: class level and product group level](#).

2.7.2.1 KIDs on Class Level

The Euronext KIDs containing class specific information are available as PDF documents via the Euronext website and via a standardised and predictable URL. Also available is an XML file that contains URLs for all KIDs and related meta data.

Please check <https://live.euronext.com/resources/key-information-document/class-level> for more information.

2.7.2.2 KIDs on Product Group Level

In addition to the KIDs on class level, Euronext also provides single KIDs for a product group (where applicable: one for call options long, one for call options short, one for put options long, one for put options short, one for futures long, and one for futures short). KIDs at product group level are available via a fixed URL structure.

Product specific information will not be included in these KIDs:

- The general information section only contains instrument type, manufacturer, website address, competent authority, and document creation date. 'Competent authority' will list all the Euronext regulators.
- Costs will not be product specific, but will include all fee variations for the product group.

Please check <https://live.euronext.com/resources/key-information-document/product-level> for more information.

3. MIGRATION PLAN

3.1 OVERVIEW

The migration to Optiq in Production will be conducted in two planned Go Live weekends – one for Cash Equities and one for Derivatives and Fixed Income. Prior to this Go Live date a number of preparatory events, infrastructure and high availability tests and rehearsals will be held to ensure a smooth migration.

	PRODUCTION MIGRATION DATES		
	Dress rehearsal	Final test in Production	Go Live
1. Cash migration	Saturday 10 Oct 2020 (completed) Saturday 31 Oct 2020	Saturday 7 Nov 2020	Monday 9 Nov 2020*
2. Derivatives and Fixed Income migration	Saturday 14 Nov 2020 Saturday 21 Nov 2020	Saturday 28 Nov 2020	Monday 30 Nov 2020*

* Pending regulatory approval

Software will be released in the test environment in order to enable customers to validate their software prior to Go Live. Details on the test and production environments can be found in later sections.

Other projects on Euronext markets may occur at the same time and may require separate development.

Production Listings

Oslo Cash Instruments (including Fixed Income) and Derivatives Contracts will be listed in the Production environment on Optiq prior to the Go Lives. More information can be found in the [Info-Flash of 17 September](#).

IMPORTANT: Oslo Cash Equity standing data is visible in the new MDG Set Of Channels ID 10 Equities Norway. If you do not see Standing Data or Market Status change messages in the Production channel, you need to verify with SFTI that you have provisioned the new Oslo MDG channel.

Dress Rehearsals

Euronext will organise two mandatory Dress Rehearsals for each migration. On the Dress Rehearsal Euronext will open the respective market(s) for customers to test access to the Optiq segments through their Logical Access IDs and the corresponding MDG channels. This will enable customers to verify their connectivity to the Production environment, log on / log off and inject orders into the OEG in Production.

Customers will not be authorised to take part in the Dress Rehearsal week-end unless they have (i) validated their conformance test, (ii) confirmed Telnet connectivity to Production and Disaster Recovery and (iii) ordered their Logical Accesses for Production.

Participation in one of the two dress rehearsals is mandatory (for each of the two migrations). Customers who have missed on both Dress Rehearsal dates will be able to test access to Production on the migration week-end. Euronext will not consider any requests or potential customer issues encountered on the day of the Production migration if the customer has not taken part in the prior mandatory Dress Rehearsals.

Cash Migration (pending regulatory approval)

OSLO BØRS MIGRATION GUIDELINES

On Friday 6 November 2020, Oslo Cash markets (Equities, ETFs, ETNs) will close as per the usual time. Client will be asked to purge their open orders at 16:30 CET and after 17:00 CET Oslo Børs surveillance will purge the remaining orders.

On Saturday 7 November 2020, clients are invited to participate to the Go-Live preparation session in Production environment. The Euronext systems will be started and clients can perform tests like any other Dress Rehearsal. During the Saturday an official communication will be sent on the Go-live decision for the following Monday.

On Monday 9 November 2020, Oslo Cash markets (Equities, ETFs) will be live on Euronext systems and will open as usual. The closing prices will be those of Friday 6 November 2020. Trading members, providers, and Data vendors must be sure to connect to the Euronext environment and not the previous Oslo Millennium system. The Oslo Cash referential will be available on Optiq platform and clients must also ensure not to connect and take referential from the previous Millennium system for the migrating products.

3.1.1 General Important Information

3.1.1.1 Overview Network Connectivity

TRADING

For customers based in Oslo/Norway, FNN will continue to provide the services from the Oslo Børs markets as today.

For customers based in the rest of Scandinavia, it is / will be possible to connect to SFTI via their POP in the Lunda datacentre.

Customers outside the Scandinavian region should connect to the Oslo Børs markets via SFTI.

SFTI can be contacted on iceglobalnetwork-info@theice.com.

CLEARING

For connectivity to the three CCPs used in the Oslo Børs equities market, the connectivity will not change for the customers as a result of the migration to Optiq.

For connectivity to LCH SA, the new clearing house in the Oslo Børs derivatives market, the LSEG CMC access network must be used and subscribed by clearing members to LCH SA.

3.1.1.2 Oslo Børs MIC Codes

- Note that a new MIC – XOBG – will be created for Oslo Derivative products.
- Note that any Oslo Warrant products will be listed under the MIC XMLI.

MIC	Operating MIC	Current Name	New Name	Products	To migrate?
XOSL	XOSL	OSLO BORS ASA	(Euronext) Oslo Børs	Shares, Equity certificates, Bonds and Standardized derivatives	Maintained. In addition the MIC XOBG will be created for the Derivative market
MERK	XOSL	MERKUR MARKET	Euronext Growth	Shares, Equity certificates	Maintained
XOAS	XOSL	OSLO AXESS	Euronext Expand Oslo	Shares	Maintained
XOAM	XOSL	NORDIC ALTERNATIVE BOND MARKET	Remains	Bonds and certificates	Maintained

OSLO BØRS MIGRATION GUIDELINES

XOAD	XOSL	OSLO-AXESS NORTH-SEA- DARK POOL	-		Discontinued
XOSD	XOSL	OSLO-BORS NORTH-SEA- DARK POOL	-		Discontinued
NIBR	XOSL	NORWEGIAN INTER-BANK OFFERED RATE	-		Discontinued
XOSC	XOSL	OSLO-CONNECT	-	TM derivatives	Discontinued

3.1.1.3 Oslo Mnemonics/Tickers vs Euronext Tickers

There will be a change of Oslo Mnemonics/Tickers with the migration to Euronext markets.

For Equities, the new mnemonic will be 5 characters max.

For Bonds, the current mnemonic will be represented in the **Instrument Name** field in Market data (*message Standing Data(1007)*).

For ETNs, the current mnemonic will be represented in the Instrument Name field. The Mnemonic field will be populated by 5 characters max.

For ETFs, the new mnemonic will be 5 characters max. The current Oslo Ticker value (which is longer than 5) will be represented in the **Instrument Name** field in Market Data (*message Standing Data (1007)*)

For Derivatives, the current Oslo mnemonic will be replaced by the AMR Code (as currently used within Euronext).

For Indices, the new mnemonic will be 5 characters max.

For iNAV ETFs, the new mnemonic will be 5 characters max.

3.1.1.4 Oslo Børs Markets

Oslo Markets Pre-migration	Oslo Markets Post-migration
NOTC	Euronext NOTC
Merkur Market	Euronext Growth
Oslo Børs	Oslo Børs
Oslo Axess	Euronext Expand Oslo
Nordic ABM	Nordic ABM

3.1.1.5 Trading Calendar

The Oslo Børs trading calendar will be maintained. After the migration to Optiq, Oslo Børs instruments will remain to be closed on the following days:

- New Year's Day
- Wednesday before Easter (half trading day);
- Maundy Thursday;
- Good Friday;
- Easter Monday;
- Labour Day;

- Constitution Day;
- Ascension Day;
- Whit Monday;
- Christmas Eve;
- Christmas Day;
- Boxing Day;
- New Year's Eve.

3.1.1.6 SBE Templates (OEG and MDG)

New SBE templates (Order Entry and Market Data) will be introduced for order entry and market data for the Oslo Børs migration to Optiq. These templates are driven by various projects, one of them being the Oslo migration.

SBE 300, was implemented with the Full Cash release in Next EUA (p-EUA). It is both backwards and forwards compatible. Clients who will trade on Oslo Cash market must use SBE version 300 or higher. Clients who are not interested in Oslo migration are not required to use it.

SBE 217 was implemented with the Full Derivatives release in Next EUA (p-EUA) and contains Oslo specific additions. Clients who will trade on Oslo Derivatives market must use SBE 217 or higher.

SBE 302 for Oslo Fixed Income was implemented on 9 September in Next EUA (p-EUA). Clients who will trade on Oslo Fixed Income is required to use SBE 302 or higher.

It is very important that trading members and providers fully understand SBE and the rules behind it.

3.1.1.7 Derivatives Trading Fees reporting

The OPEJ3 file contains the trading fees due by Exchange participants operating on the Euronext Derivatives markets (Amsterdam, Brussels, Lisbon, Paris, and Oslo).

As a consequence of the Oslo Børs derivatives migration, the OPEJ3 file will be enhanced to include the billing currency of trading fees. The updated OPEJ3 specification can be found on [IT documentation](#) page.

The trading fee amounts will be reported per billing currency in the OPEJ3 files which will be determined further to the following criteria:

- In Norwegian Krone (NOK) for trading members only trading on the Oslo Børs derivatives market and having made explicitly this billing currency choice in NOK to Euronext, or;
- In Euro (EUR) in all other cases, trading members actively trading in products of:
 - Euronext Amsterdam, Brussels, Lisbon, Paris derivatives markets, and
 - Oslo Børs Derivatives markets.

Note : The exchange rate conversion NOK to EUR for international members trading on Oslo Børs products is performed on a daily basis.

The OPEJ3 is sent on a daily basis to the CCP LCH SA who distributes it to the GCMs.

3.1.1.8 Derivatives instruments ISIN change in Optiq Derivatives

As a consequence of the migration of Oslo Børs Derivatives instruments to the Optiq Derivatives system, Euronext will assign new ISIN codes to each individual and tradable derivatives instrument when migrating onto Optiq.

The ISIN codes of the current legacy derivatives trading platform will not be kept after the migration.

In order to facilitate the ISIN correspondence between the current legacy derivatives trading platform and Optiq, Euronext will provide a mapping table in order to help identify the key used to establish such correspondence and enable data vendors, trading participants, and trading ISVs to apply it in their system if it is deemed required.

For end to end consistency across the trading to clearing chain, such a file will also be made available to LCH SA, clearing ISVs and clearing members.

The File specifications was provided and is available in [IT Documentation](#) (*EURONEXT MARKETS - DERIVATIVES MAPPING FILE SPECIFICATION V1.4*). Files comparing Next EUA vs SOLA Production are being updated weekly and The Production will be provided in due time.

3.1.1.9 Cash Interoperability Trading Participant Identification

Trading members must be aware that the current Oslo Børs mnemonics will **no longer be used** with the interoperable CCPs in the trade message reports further to the migration to Optiq.

Euronext cash trading participants are configured with the following codification in the Euronext membership forms:

- Euronext Trading member ID which is used to identify the trading participant in the Euronext Trading platform – Optiq, TCS and Saturn – and are conveyed in the order entry messages.
- Trading Member BIC code, which is used to report on the Trading Member unique ID in the real time trade report message to the interoperable CCP
- Clearing Member BIC code, which is used to report on the Clearing Member unique ID in the real time trade report message to the interoperable CCP

As a consequence, further to the migration, the BIC code will be the reference to identify the trading participants in their front to back reconciliation with their clearing members.

3.1.1.10 Derivatives contract specifications harmonisation

Current Oslo Børs derivatives contract specifications specify that the settlement date for the payment of variation margins and premiums occurs on T+2. Those payment terms are applied by the current CCP SIX x-clear.

In order to harmonize Derivatives contract specifications across all Euronext markets, the Oslo Børs derivatives contract specifications will be updated so that the settlement date for the above payments will occur on T+1. This will be effective with the migration of positions to the CCP LCH SA.

As a consequence of this, it is worth noting that after the migration on 30th November:

- SIX x-clear will release on Tuesday morning 1st December the last variation margins and premium amounts corresponding to Friday 27th November end of day positions prior to the migration (for the members who have a calculated variation margin and which is due to settle on Tuesday)
- LCH SA will start crediting/debiting variation margins and premium amounts on Tuesday morning 1st December corresponding to Monday 30th November end of day positions

This specification change will not affect the standard T+2 settlement delay for the physical delivery of securities.

3.1.1.11 TVTIC format for Oslo Migration

As communicated in the [Operational Notice of 29 September](#) and [Oslo Børs Delta](#), Euronext would like to inform customers that the **current TVTIC format** will be used for the Oslo Cash Market Go-live on 9 November 2020, pending regulatory approval.

As a reminder, the current TVTIC format = **Execution ID + ISIN**

The current TVTIC format is explained in the [Euronext Markets – Optiq MDG Client Specifications V4.0.2](#) (section 6.19).

The implementation of the New TVTIC format will take place in Q4 2020.

3.1.1.12 Oslo ETNs

Euronext informs Oslo Børs' members that all ETNs currently listed on Oslo Børs will not be migrating to Euronext's Trading Platform.

The 3 issuers who currently offer ETNs on Oslo Børs have decided to delist their ETNs from Oslo Børs and have their products early expired or migrated to Nasdaq OMX.

For further information, please refer to the [notice](#) published on Oslo Børs website.

Even though no structured products will migrate from Oslo Børs to Euronext on 9 November, Euronext is determined to create a new range of structured products (incl. warrants, turbos, certificates and ETNs) in close cooperation with its partners for the Norwegian investors as for the Nordic investors in general.

3.1.2 OEG and Gateway (MDG) EUA availability

The OEG and MDG Optiq® applications are already available for clients in the Euronext Next External User Acceptance (Next EUA (P-EUA)) on both Cash and Derivatives environment.

Next EUA environment(s) will be upgraded to incorporate required Oslo Børs specific changes and updated technical specifications will be available and communicated. Next EUA upgrades will always be communicated in advance through an Optiq Notice / Oslo Børs Delta announcement.

Furthermore access to Next EUA (formerly P-EUA) is already set up from an ICE Data Services standpoint.

Cash Next EUA platform is available on week days between 9:00 and 22:00 CET.

Derivatives Next EUA platform is available on week days between 9:00 and 22:30 CET.

Both Cash and Derivatives Next EUA (p-EUA) environments are down every Wednesday morning until 13:00 CET for maintenance.

3.1.3 Saturn Next EUA Availability

Saturn OBOE is already available for clients for Euronext markets. The Oslo Migration brings additional changes to Saturn:

Saturn OBOE Cash was updated with Oslo Børs specific features in **June 2020**.

Saturn OBOE Cash full scope was implemented in **July 2020**.

Saturn OBOE Fixed Income was implemented in **September 2020**.

	Next EUA Release
Saturn OBOE Cash enhancement Lot 1 - Added possibility for the counterparty to see Saturn OBOE trade details	June 2020 (completed)

Saturn OBOE Cash enhancement Lot 2 -A new Counterparty Type (3 - Non Euronext Member), - New Euronext Trade Flags (VW: 'VWAP Trade', DT: 'Derivative-related Trade'), - An updated Trading Capacity value (MTCH (Market Principal Trading). Applicable only for OSLO.), - A new OBOE field Settlement Date (optional) in GUI / API.	July 2020 2020 (completed)
Saturn OBOE Fixed Income enhancement Waiver Indicator new value 'ILQD' available for OBOE Bonds only, OTC Post Trade Indicator, new values 'PAC' (Package Trade), 'ILQD' (Illiquid), 'SIZE', 'LRGS' (Large In Scale) available for OBOE Bonds only, New trade flags 7 – OT, 8 – ON, 9 – RE, 10 – OE, 11 – OH, 12 – OL, 13 – OP for Fixed income. New trade flags are linked to either existing or new trade types, please see the Operational Notice for details.	September 2020(completed)
Saturn OBOE Deferral Oslo Feature New Deferral (Oslo) indicator is available for Oslo bonds only.	September 2020 (completed)

3.1.4 Central Counterparty EUA Availability

3.1.4.1 Cash Equity Clearing

Interoperable CCPs are connected to the Euronext Cash Next EUA (P-EUA) environment since **July 2020**. Front-to-back testing is open to clients as from **1st September 2020**.

Please be informed that the ID of the clearing house in case of a CCP clearable transaction will be systematically populated by Optiq® in :

- Execution report (8) in the field called ContraBroker (375) on FIX protocol and
- Fill messages in the field called Counterpart Firm ID on SBE Protocol.

For Oslo Børs cash equities markets, the CCP ID Values populated in the above messages will be:

- '3'= LCH Ltd,
- '5'= SIX x-clear,
- '6'= EuroCCP.

The CCP testing platform availability is described in the following table:

CCP	Testing platform availability
LCH Ltd	week days between 9:00 and 16:30 CET
SIX x-clear	week days between 9:00 and 16:30 CET
EuroCCP	week days between 9:00 and 16:30 CET

3.1.4.2 Derivatives Clearing

LCH SA derivatives clearing platform is already connected to Euronext Optiq Derivatives platform which allows to perform front-to-back testing on current available Euronext derivatives instruments.

Euronext introduced Oslo Børs derivatives instruments – cf. appendix 7.4 – in the testing environment in coordination with LCH SA in **April 2020** to enable front to back testing for clients on current BAU derivatives clearing functionalities. Target Oslo Børs derivatives instruments are all available with LCH SA.

LCH SA delivered a release covering specific features for Oslo Børs clearing (e.g. Single Stock Futures with physical delivery, etc.) in **July 2020** and communicated a first Testing Guide in **July 2020**, followed by regular updates.

Next to this, LCH SA and SIX x-clear will organise one specific Dress Rehearsal involving clearing members to test the position migration / transfer of Oslo Børs derivatives instrument open interest in the EUA environment **early November 2020** (exact date to be confirmed in due course by LCH SA). LCH SA provided a detailed description of their dress rehearsal and organization (Migration Guidelines) in **September 2020**.

LCH SA testing platform is available during week days between 7:30 and 19:30 CET.

More information can be found in LCH SA's Testing Guide available on their website secure area: (https://secure-area.lchclearnet.com/secure_area/Default.asp).

The following table summarises the above key test milestones:

EUA scope	Opening of the EUA
Availability of Oslo Børs BAU instruments for clearing and connection with LCH SA	April 2020
Availability of Oslo Børs clearing specific features with LCH SA	July 2020
CCP Dress Rehearsal testing (position migration)	Early November 2020

3.1.5 Managing Order Entry and Market Data Services and Files during the Migration

3.1.5.1 Drop Copy

Drop Copy, a service providing near real-time copies of trade reports & order messages on Optiq, will be available for Oslo instruments via dedicated Drop Copy gateways and accesses.

Clients have to individually request an Optiq Drop Copy access, which is available only in FIX format. A Drop Copy provides messages across the assigned market (Cash or Derivatives) segments. More details can be found in the *Euronext Markets – Optiq Drop Copy Service* document.

To order Drop Copy Accesses in EUA and for Prod, use the [Connect order forms](#).

3.1.5.2 EOD Application Files

The Euronext End of Day service, an application allowing a Member Firm to retrieve and download several files called “End Of Day” files containing order and trade information belonging to its Member Firm code, will also include Oslo. This service is only available for Euronext Cash Markets (including Fixed Income).

Trade files in the End of Day (EOD) applications for Optiq® remain in the same format as today with some adjustments, such as adjustment of values to be in line with Optiq®. Timestamps will match the ones in Optiq® and will be provided in UTC

Order files in Optiq® are provided in two different formats: XML and flat file.

More details can be found in the *Euronext Cash Markets – End of Day Files Specifications*.

3.1.5.3 Euronext File Services

Euronext File Services (EFS) is a service that provides full referential data for the Euronext markets, as well as feed configurations, key trading information and MDG and OEG SBE templates. Users of the Euronext market data feed should use the service to (i) Configure feed connections, (ii) Obtain the referential data, configuration and setup parameters, that are published on a daily basis. This is used for all Euronext markets.

Oslo Børs Cash and Derivatives markets will be integrated into the existing files on EFS.

The files for EUA are available : <https://efs-eua.euronext.com/main.html>

The files for Production are available : <https://efs.euronext.com/main.html>

More details can be found in the *Euronext Markets – Optiq File Specifications*.

3.2 TESTING APPROACH AND TEST ENVIRONMENTS

Next EUA is the environment which will be used for end-to-end testing of Optiq and for conformance for the Oslo Børs migration. The deliveries for the Oslo Migration in Next EUA will be made in different lots.

The first delivery for Cash was a light scope and included the creation of a subset of trading groups and Equity instruments. The Market Data channels for Oslo were not yet in place, and market data for Oslo Equities was sent through *MDG SET OF CHANNELS ID 9 – EQUITIES DUBLIN* (**completed**)

The second delivery was full Cash scope, which included a new SBE Template version 300 for OEG/MDG and the new Market Data channels for Oslo. It also included Indices. This second delivery marked start of conformance testing. (**completed**)

Derivatives had one delivery which came with SBE Template version 217. (**completed**)

Saturn OBOE Lot 1 Cash for Oslo was released in June 2020. (**completed**)

Saturn OBOE Lot 2 Cash for Oslo was released in July 2020. (**completed**)

Saturn OBOE with Oslo Fixed Income enhancements was released September 2020.. (**completed**)

Saturn OBOE with the Deferred Pub. feature was released September 2020. (**completed**)

Find below the timeline for Next EUA changes for Optiq.

The Availability date indicates when they are ready for clients to test. The technical implementation of the Full releases (and implementation of new SBEs) will occur about two weeks prior to each date and will be communicated in advance through Optiq Notice).

	Next EUA CHANGES	
	Availability for clients	Info Flash / Documentation
Technical set up For connectivity testing and validation of OE sessions	Already available (completed)	-

	Next EUA CHANGES	
	Availability for clients	Info Flash / Documentation
Light “referential” Cash <i>Subset of Trading groups, patterns, and Equity instruments will be listed. Light Cash means that the data for Oslo is routed temporarily to the Equities Dublin channels until new channels are made available.</i>	17 March 2020 (completed)	-
Full Derivatives <i>New Oslo Derivatives exchanges, contracts listed, SBE 217 will be implemented for Derivatives.</i>	13 April 2020 (completed)	Optiq Notice
Full Cash <i>Additional instruments will be listed gradually*. New Oslo MDG channels will be available. Subset of Indices will be added. SBE 300 will be implemented for Cash.</i>	18 May 2020 (completed)*	Optiq Notice
Saturn OBOE Lot 1 <i>Oslo Cash Equities specific features</i>	June 2020 (completed)	-
Saturn OBOE Lot 2 <i>Oslo Cash Equities specific features</i>	July 2020 (completed)	Optiq Notice
Fixed Income APA <i>Oslo Fixed Income APA</i>	July 2020 (completed)	Optiq Notice
CCP connectivity access on Next EUA, for end-to-end testing in the Optiq® testing environment	Derivatives July 2020 (completed)	Optiq Notice
Oslo Fixed Income and Fixed Income OBOE <i>New SBE template, new market data message (Long Order Update), Non-Anonymous implementation. For Saturn: Waiver Indicator new value ‘ILQD’ available for OBOE Bonds only, OTC Post Trade Indicator, new values ‘PAC’ (Package Trade), ‘ILQD’ (Illiquid), ‘SIZE’, ‘LRGS’ (Large In Scale) available for OBOE Bonds only, New trade flags 7 – OT, 8 – ON, 9 – RE, 10 – OE, 11 – OH, 12 – OL, 13 – OP for Fixed income. New trade flags are linked to either existing or new trade types, please see the Operational Notice for details.</i>	9 September 2020 (completed)	Operational Notice
Saturn OBOE Fixed Income Deferred Pub. <i>Oslo Fixed Income OBOE deferred publication feature. Deferral (Oslo) is now available for</i>	30 September 2020 (completed)	Operational Notice

* **Note:** The listing of Cash / Fixed Income instruments in Cash Next EUA is ongoing.

3.2.1 Checking Order Entry Connectivity in Next EUA

Euronext will provide “default” Order Entry Sessions for Next EUA to new clients’ Member Connectivity Administrators and to new providers. Existing Euronext clients already have logical access ids for the EUA environments. Customers who have not received their Order Entry Sessions for Next EUA are invited to contact Customer Access Services (See Contacts section for details)

Full connectivity details to Next EUA can be found in the *EURONEXT MARKETS – OPTIQ® OEG CONNECTIVITY SPECIFICATIONS 2.2.2* document.

Clients are able to perform telnet to the Optiq Next EUA environment. Please refer to the [Euronext Markets - Order Entry \(OEG\) Connectivity Telnet Tests](#) document.

These documents are available in the [IT Documentation](#) section.

3.2.2 Connectivity to Next EUA

As a reminder, Euronext will provide Order Entry Sessions to all new clients' Member Connectivity Administrator and to all new providers. Existing Euronext clients should already have access to EUA environments. Next EUA Drop Copy sessions must be ordered by customers.

External User Acceptance (EUA) environments

Trading members and providers who are current members on Oslo Børs, but not on Euronext, will have a number of "default" Logical access per Optiq segment sent to them (in both SBE and FIX protocol) in due time. These connections has been set with minimum throughput to allow clients to start their technical tests. Trading members and providers that are already a member of Euronext should already have logical accesses to access Next EUA (p-EUA) environment. For information, please contact Customer Access Services.

In addition to the default Logical Accesses, clients may request additional custom connections. This should allow clients and Euronext to perform tests in Optiq in the most realistic conditions.

The requests for adjustment and/or creation of new Logical Accesses in EUA environments can be submitted via the following forms:

EUA Ordering Forms	
Optiq Cash Order Entry	Access/DC creation – EUA
	Access modification
	Access deletion
Optiq Derivatives Order Entry	Access/DC creation – EUA
	Access modification
	Access deletion

Customers who have not received their Order Entry Sessions in Next EUA are invited to contact Customer Access Services team (see contact details in the [Support](#) section of this document).

Order Entry Gateway: Clients can refer to the *Euronext Markets – Optiq OEG Connectivity Specifications* document for full connectivity details to the Next EUA (P-EUA).

Market Data Gateway: Clients can refer to the *Euronext Optiq Market Data Gateway External User Acceptance Environment* for full connectivity details to MDG Next EUA (P-EUA).

Saturn/OBOE: Clients can refer to Saturn User Guide and Saturn Specifications to have full details of the system.

Please contact the Customer Access Services team for Saturn access.

3.2.3 Validating Conformance Tests

The main test environment for the Oslo Børs migration is Next EUA (P-EUA). Below is a chart on the conformance tests for the migration(s).

The Oslo migration has two go-lives, and trading members/providers need to ensure to complete the relevant conformance test(s) prior to each go-live.

Note that they are applicable for Cash, Derivatives and Fixed Income markets. A client active on both Cash and Derivatives markets would need to perform **two** functional conformance tests, one for each market. The same applies for the other conformance tests (so two High Availability, two MDG Gateway validations, etc).

Oslo Fixed Income will include additional tests (as it also includes a new SBE template 302). The scope will be communicated in due time. A Cash member who is also part of Fixed Income will need to do the Cash conformance tests + additional Fixed Income tests.

Test to be Performed				Cash		Derivatives		Fixed Income	
	Cash	Derivatives	Fixed Income	Start Date	End Date	Start Date	End Date	Start Date	End Date
Functional Conformance Test [Mandatory]	✓	✓	✓	18 May	One week before First Dress Rehearsal	18 May	One week before First Dress Rehearsal	9 Sep 2020	One week before First Dress Rehearsal
High Availability [Mandatory]	✓	✓	(same as Cash)	2 March 2020	One week before First Dress Rehearsal	2 March 2020	One week before First Dress Rehearsal	2 March 2020	One week before First Dress Rehearsal
Market Data Gateway (MDG) [Mandatory]	✓	✓	✓	18 May	One week before First Dress Rehearsal	18 May	One week before First Dress Rehearsal	9 Sep 2020	One week before First Dress Rehearsal
Throttling [Highly Recommended]	✓	✓	(same as Cash)	2 March 2020	One week before First Dress Rehearsal	2 March 2020	One week before First Dress Rehearsal	2 March 2020	One week before First Dress Rehearsal
Front-to-Back [Mandatory]	✓	✓	N/A for Fixed Income	September 2020	Go Live	July 2020	Go Live		
Saturn OBOE [Mandatory]	✓		✓	1 June 2020	Go Live			9 Sep 2020	Go Live
Saturn SLC [Mandatory]	✓	✓	(same as Cash)	2 March 2020	One week before First Dress Rehearsal	2 March 2020	One week before First Dress Rehearsal	2 March 2020	One week before First Dress Rehearsal

Note: Migration Go Live will be mandatory for every Oslo Børs Member, either using a certified Order Entry and Market Data solution or developing their own Order Entry and Market Data solution.

3.2.3.1 Order Entry Gateway (OEG) Tests

Following members and providers are required to perform a mandatory OEG **full conformance** test:

- New trading members accessing directly to Euronext Optiq® platform not conformed yet to the Optiq® Platform
- Software providers not conformed yet to the Optiq® Platform

The Functional conformance scripts for Cash and Derivatives are already available under IT Documentation page.

- Trading members and Software providers already certified on the Optiq® platform are required only to perform an OEG **light conformance** test.

These test cases can be found below.

The following table describes the kind of conformance test applicable for each member and provider.

	Trading Member developer (if not conformed for Optiq®)	Liquidity Provider using a provider only	Trading Member using a provider only	Provider (if not conformed for Optiq®)
Full / Light conformance	Full	Light	Light	Full
Mandatory / optional	Mandatory	Mandatory	Mandatory	Mandatory

Guidelines for Conformance test for Existing customers:

The Light Conformance test scenario (for existing Euronext member(s)) is the following:

Administration Messages	Logon (100)
Submission Application Messages	New Order (01) Ack (03) Fill (04) Kill (05)
Liquidity Provider Orders	Liquidity Provider or Market Maker Liquidity Provider Account
Cancellation	Trade Cancellation initiated by exchange Order Cancellation (Client)

Please find the Functional conformance script and booking forms below:

	Cash		Derivatives		Fixed Income	
	Script	Form	Script	Form	Script	Form
Functional Conformance (mandatory)	Script	Booking form	Script	Booking form	Script	Booking form (Same as Cash)

As a reminder, no conformance test will take place on Wednesday morning as the Next EUA platform is closed for maintenance until 13:00 CET.

Please note that customers will not be able to access the Production environment neither during the Dress Rehearsal nor for Go-Live unless they have completed their conformance tests.

3.2.3.2 High Availability testing in Next EUA

High availability test is mandatory **only** for customers that are required to complete the **full conformance test**.

The High Availability order entry test contains different scenarios, some of them being “single-partition” and some “multi-partition”. Multi-partition is mandatory for trading members and providers who are trading Equities (Cash Equities market) and Equity Derivatives (Derivatives market). These segments have multiple partitions, thus multi-partition HA is crucial.

High Availability testing is part of the Conformance certificate (Order Entry Functional Conformance + HA). A trading member/provider will only receive their conformance certificate once HA testing has been completed. Only by receiving the certificate is a client considered as “conformed”.

	Cash		Derivatives		Fixed Income	
	Script	Form	Script	Form	Script	Form
High Availability (mandatory)	Script	Mono-Partition HA SBE Cash	Script	Mono-Partition HA SBE Cash	(Same as Cash)	
		Mono-Partition HA FIX Cash		Mono-Partition HA FIX Cash		
		Multi-Partition HA SBE Cash		Multi-Partition HA SBE Cash		
		Multi-Partition HA FIX Cash		Multi-Partition HA FIX Cash		

The timetables for High Availability testing in Cash and Derivatives Next EUA (p-EUA) environments can be found [here](#).

Full details regarding High availability test can be found in the High Availability section in the conformance scripts (Cash and Derivatives) available on the [IT Documentation](#) page.

3.2.3.3 Market Data Gateway (MDG) Test

A Market Data Gateway (MDG) validation form will be mandatory for the Oslo Migration.

- New trading members, software providers or market data providers not conformed yet to the Optiq® Platform needs to submit the Full MDG Check List web form.
- Trading members, software providers or market data providers already certified on the Optiq® platform are required only to complete and submit the Light MDG check List web form.

Clients using exclusively a technology provider are not required to submit the validation form as this will be managed by their technology providers. Customers are required to verify the conformance of their software solutions for all applications that wish to use the Optiq® Market Data in production.

The MDG Check List forms validates that the member/provider understand and properly use the SBE template, various MDG messages, and concepts related to Market Data.

Please see *Euronext Markets - Optiq MDG Client Specifications* and *Euronext Optiq® Market Data Gateway Production Environment* documents for details on how Market Data works on Optiq. Please also see the *Euronext Derivatives Markets – Optiq Kinematics Specifications* and *Euronext Cash Markets - Optiq Kinematics Specifications*.

Please find the MDG validation forms below:

	Cash		Derivatives		Fixed Income	
	Script	Form	Script	Form	Script	Form
Market Data Gateway (MDG) (mandatory)	-	New clients: Validation form	-	New clients: Validation form	-	Validation Form
		Existing Euronext clients: Validation form		Existing Euronext clients: Validation form		

3.2.3.4 Saturn (OBOE/SLC) Test

On Saturn system the definition of full or light conformance tests does not apply.

Saturn OBOE Cash clients are only requested to perform a File upload and insertion of OBOE declaration and confirm the submission via a webform. Saturn OBOE Cash is relevant for the Cash market.

Saturn SLC and clients will likewise be requested to perform a File upload and insertion of a SLC file and confirm the submission via a webform. Saturn SLC is relevant for both Cash(+Fixed Income) and Derivatives.

Please find the Saturn validation forms below:

	Cash		Derivatives		Fixed Income	
	Script	Form	Script	Form	Script	Form
Saturn (mandatory)	-	Validation form	-	Validation form	-	Validation form

3.2.3.5 Throttling Test

Throttling testing is a highly recommended tests for customers to ensure they understand and can handle the Throttling mechanism on Optiq. Customers can follow the Throttling conformance script and can submit a webform confirming their test completion. This is relevant for Cash (+Fixed Income) and Derivatives markets.

These tests follow the Throttling mechanism that is described in the “OEG Throttling” section of the *Optiq OEG Connectivity Features & Configuration Specifications* document.

	Cash		Derivatives		Fixed Income	
	Script	Form	Script	Form	Script	Form
Throttling (highly recommended)	Script	Validation form	Script	Validation form	(same as Cash)	

3.2.4 Front-to-back Testing

The migration to Optiq brings with it a large number of changes impacting the post trade systems of Clearing Members, in reconciliation with client back-offices. Clients are strongly encouraged to review the information that is included in the appendices of this document, as well as dedicated communication for the clearing impacts, and to ensure that their systems use the correct mapping of values and instructions for clearing data.

As a result, **front-to-back testing** is mandatory for the Oslo Børs migration for both Cash and Derivatives markets.

These tests will allow to confirm that the mapping of fields and the associated configured values from Order Entry to posting in clearing accounts is correctly populated by the clients’ trading facing systems, clearing members and back-offices.

When performing the Front-to-back clearing conformance test, the **Trading member is responsible to confirm with their Clearing member that mapping is as expected.**

	Trading Member developer	Member developer + using a provider	Market Makers using a provider only	Trading Member using a provider only	Provider
Mandatory / optional	Mandatory	Mandatory	Mandatory	Mandatory	Mandatory**

**** For providers that are hosting multiple trading members, each trading member must pass the front-to-back tests.**

Clearing testing must be completed by each individual trading firm, identified by a Firm ID (a.k.a. Member code / TMF) to ensure their account and configuration setup is correct.

Please find below the script and validation forms:

Cash		Derivatives		Fixed Income	
Script	Form	Script	Form	Script	Form

Front-to-back (mandatory)	No script	Validation form	Script	Validation form	N/A
---------------------------------------	-----------	---------------------------------	------------------------	---------------------------------	-----

3.3 PRODUCTION ENVIRONMENT

3.3.1 Direct Network Connectivity for Order Entry and Market Data Access

All clients (including Trading Members) that would like Market Data connectivity, either directly connected or via an Extranet Service Provider (ESP), Application Service Provider (ASP) or data vendor need to sign a Euronext Market Data Agreement (EMDA) to get market data access in production.

Clients (including Trading Members) that already have Euronext market data and would like to receive Oslo Børs market data will need to update their existing EMDA order form.

Oslo Børs clients (including Trading Members) that do not yet have Euronext data and wish to continue to receive Oslo Børs data will need to sign the Euronext Market Data Agreement prior to 1 July 2020.

The documentation for the Euronext Market Data Agreement can be found [here](#).

IMPORTANT

Customers must ensure that they order the Oslo Market Data Channels for Production prior to Go Live!

Clients that do not use an ESP or ASP and who would like to require direct connectivity can access Euronext's markets via the Secure Financial Transaction Infrastructure[®] (SFTI[®]).

Clients that already have a SFTI connection will need to update their SFTI order form to access the new Oslo Børs Equities and Nordic ABM channels in production.

Oslo Børs clients that do not yet have Euronext data and wish to connect directly to Optiq[®] MDG will need to order a SFTI[®] connection.

Regarding FNN access, please refer to section 3.1.1.1.

For more information about SFTI or if you wish to obtain access to the Optiq[®] Order Entry Gateway or MDG channels via SFTI, please contact your sales representative at ICE Data Services or send an email to iceglobalnetwork-info@theice.com.

Additionally, ICE Data Services might contact Members to arrange administrative and form-filling processes for the access to Optiq[®] JSE production.

Please note that access to EUA is already set up from an ICE Data Services standpoint.

3.3.2 Ordering Order Entry Sessions to Access Production

All Trading Members connecting to Oslo Børs using Optiq[®] are required to submit their Optiq[®] Cash and Derivatives OE Sessions Order forms at the latest one week before a Dress Rehearsal. Please note that **Providers (ISVs, ASPs) do not have the ability to order OE Sessions on behalf of their clients.**

All Trading Members are required to order their Optiq Logical Accesses for Production one week before the start of the Dress Rehearsals.

OSLO BØRS MIGRATION GUIDELINES

The Logical Access connectivity details will be made available two days before the start of the Dress Rehearsals.

Trading Members who are already Euronext members should already have Logical Access IDs, but need to ensure that their current Logical Access IDs and related message outputs are up-to-date to account for Oslo Børs activities.

Please note that **Providers (ISVs, ASPs) do not have the ability to order OE Sessions on behalf of their clients.**

For any questions, please contact Customer Access Services (Phone: +33 1 85 148 589, or email: cas@euronext.com)

The Production Order Forms are available online on the Euronext website at the following location (<https://connect2.euronext.com/en/membership/forms>)

PROD Ordering Forms	
Optiq Cash Order Entry	Access Creation - Production
	Drop Copy Creation - Production
	Access Creation – Free Package
	Access Modification
	Access Deletion

PROD Ordering Forms	
Optiq Derivatives Order Entry	Access Creation - Production
	Access Creation Market Maker - Production
	Drop Copy Creation - Production
	Access Modification
	Access Deletion

After receiving a request for a Logical Access, Customer Access Services will communicate login information to customer by email. Customers are required to have tested their connectivity in Production before the mandatory Dress Rehearsal.

As a reminder:

- Providers cannot order OEG Logical Accesses for Production
- Only trading members can order Production OEG Logical Accesses
- Logical Accesses can only be ordered by a nominated Member Connectivity Administrator (MCA). Any customer without an MCA account should contact the Customer Access Services (CAS) team for more information at cas@euronext.com / Tel: +33 1 85 148 589

3.3.3 Testing Order Entry Connectivity to Production and the Disaster Recovery Environments

Telnet connectivity testing for Euronext Production and Disaster Recovery environments is already available. Please refer to *Euronext Markets – Optiq OEG Connectivity Telnet Tests* document for more information.

Technical connectivity testing does not require any specific connectivity setup (i.e. Logical Access information) as it covers generic telnet testing.

Customers are required to perform Telnet commands in order for Euronext to receive network validation of the connectivity.

3.3.4 Dress Rehearsals

The mandatory Dress Rehearsals will take place before each Go Live, allowing customers to test the target Oslo Børs migration Production implementation in advance.

Customers will not be authorised to take part in the Dress Rehearsal week-end unless they have (i) validated their conformance test, (ii) confirmed Telnet connectivity to Production, and (iii) ordered their OE Sessions for Production.

The scope of the tests are the following for both Cash and Derivatives:

- Order Entry and Market Data
- The schedule and scope of Dress Rehearsals will be communicated at a later date in a dedicated document

Tests which are out of scope are the following:

- Clearing tests (LCH SA/LCH Ltd/EuroCCP/SIX X-Clear)
- End of Day files
- Functional high availability

Customers will be expected to conduct the following tests:

- Secure network resources to validate firewall / security path
- Connect to the Production environment
- Inject orders
- Purge the book at the end of the day and restore order book to Friday night
- Validate participation at the end of the day via a webform

The roll-back after each dress rehearsal should be managed by the participants of each test to ensure a smooth start-up on the next trading day. **All clients are required to participate in at least one Saturday dress rehearsal prior to EACH Go Live they will participate to.** Participation in the migration week-end is highly recommended.

On the Saturday before each Go-live, clients will be invited to connect to the Optiq OEG, as well as to the MDG multicast channels that will be implemented in Production on the next trading day.

Once the Go-Live is confirmed, clients will keep the configuration in place and will **not** perform a roll-back in order to begin trading using Optiq OEG and MDG on the following Monday. Clients will need to ensure that they have purged their systems of the orders placed during the Saturday tests.

A detailed description of the dress rehearsals, go-live organization, disaster recovery testing and test scenarios will be provided in due course.

3.3.4.1 CCP Dress Rehearsals

On **Cash Equity clearing**, there will be **no connectivity Dress Rehearsals** with interoperable CCPs and clearing members.

However, note that on **Derivatives clearing**, LCH SA plans to execute a specific Dress Rehearsal tests in the EUA platform with clearing members wishing to take part to the migration in order to validate the position migration transfer between SIX x-clear and LCH SA.

LCH SA communicated a Migration Guidelines detailing their plan in September 2020; one mandatory DR for testing the CCP position migration is scheduled early **November 2020** (exact date to be confirmed by LCH SA).

3.4 CUSTOMER READINESS CHECKLIST

OSLO BØRS MIGRATION GUIDELINES

**Only Members without Order Entry sessions for Production Cash and/or Derivatives must order Order Entry sessions.*

Note: Euronext members who already have an access to Optiq® and Saturn already have Order Entry Sessions for Next EUA (P-EUA) to be used for conformance tests.

4. OSLO BØRS MEMBERSHIP AND CONNECTIVITY APPROACH DURING MIGRATION PERIOD

Existing Oslo Børs customers who are not on Euronext already will have to update their membership agreement during the migration project.

Existing Oslo Børs customers who are already members on Euronext will not need to fill any particular membership papers.

Customers who are Euronext members, but currently not Oslo Børs member, would have to sign a Euronext membership extension form.

More details are in the Customer Readiness Checklist.

5. COMMUNICATION PLAN

Communication will continue throughout the Oslo Børs Migration project, in order to ensure that all clients have access to clear and useful information for the duration of the project. The following list of communications will be sent to convey key details and clients should be sure to subscribe to any relevant distribution lists.

- **Info Flashes:** These communications will announce key milestones of the project, and details that all clients should be aware of, such as: documentation publication, the opening of each platform, and confirmed Production implementation dates.
- **Oslo Børs Delta:** up-to-date information prior to and during the migration period will also be disseminated via the existing channel **Oslo Børs Delta**. If you for any reason at all wish to be removed from Delta notices, please send an email to webansvarlig@oslobors.no.
- **Optiq Notices / Operational Notices:** The Client Support desk will provide programme updates via 'Operational Notices' to inform the market of milestones, EUA environment details, Optiq specifications, issue reminders of deadlines, changes and testing, as well as other important programme updates.
- **Technical Documentation:** new and updated documentation will be provided throughout the course of the migration, and will provide clients with the required information to develop and implement Optiq® and Saturn OBOE features. These documentations will be available in the IT Documentation section.

Note: to subscribe to Optiq Notices / Operational Notices, please contact Operational Client Services Desk on clientsupport@euronext.com or +33 1 8514 8585.

Subscription to Info Flashes can be done through Connect portal.

6. CONTACTS

Team	Contact details
Operational Client Services Members' first point of contact for Oslo Børs migration. Technical & functional assistance with the development and testing on Optiq. Assistance with the use of the EUA environment, conformances, timeline and customer readiness checklist.	<ul style="list-style-type: none"> ■ Tel: +33 1 85 14 85 85 ■ Email: Oslomigration@euronext.com
Membership Support to new and existing members with the onboarding process for becoming a trading member, including contracts (TPAA).	<ul style="list-style-type: none"> ■ Tel: +31 207 214 264 ■ Email: EuronextMembership@euronext.com
Customer Access Services Support to market participants' access and connections to Euronext markets, including Logical Accesses on Optiq (i.e. access and log-in credentials to Optiq OEG).	<ul style="list-style-type: none"> ■ Tel: +33 1 85 14 85 89 ■ Email: CAS@euronext.com
SFTI For more information about SFTI or if you wish to obtain access to the Optiq® Order Entry Gateway or MDG channels via SFTI, please contact your sales representative at ICE Data Services.	<ul style="list-style-type: none"> ■ iceglobalnetwork-info@theice.com

7. APPENDIX

7.1 LIST OF TRADING GROUPS / EXCHANGES THAT WILL MIGRATE TO OPTIQ®

Cash Markets

The following trading groups are included in the scope of migration of Oslo Børs instruments to Optiq®:

Gr.	Class Name	Trading Pattern	OPTIQ SEGMENT
OA	SHARES - OBX	Continuous TAL random	Equities
OB	OSLO - EQUITIES - CONTINUOUS	Continuous TAL random	Equities
OC	OSLO - EQUITIES - CONTINUOUS	Continuous TAL random	Equities
OD	EQUITIES - EXPAND OSLO	Continuous TAL random	Equities
OE	EQUITIES - GROWTH OSLO	Continuous TAL random	Equities
OF	SHARES - OBX - NON UL	Continuous TAL random	Equities
OG	OSLO - EQUITIES - CONTINUOUS - NON UL	Continuous TAL random	Equities
OH	OSLO - EQUITIES - CONTINUOUS - NON UL	Continuous TAL random	Equities
OI	ETF - CONTINUOUS	Continuous Trackers	Funds
OJ	BONDS - CONTINUOUS	Continuous Random	Fixed Income
OL	BONDS - DOUBLE FIXING	Double Auction Random	Fixed Income
OM	BONDS - NO MATCHING	Call only	Fixed Income
ON	BONDS - NORDIC ABM	SATURN ONLY	Fixed Income
OP	SP MULTI VPS 09h00-16h20	Continuous D - Quote Driven	Warrants and Certificates
OQ	SP MULTI VPS- 09h00-16h20	Continuous D - Quote Driven	Warrants and Certificates
OW	OSLO - SUBSCRIPTIONS RIGHTS-CT	Continuous TAL random	Equities
OX	EXPAND - SUBSCRIPT RIGHTS-CT	Continuous TAL random	Equities
OY	GROWTH - SUBSCRIPT RIGHTS-CT	Continuous TAL random	Equities

Note: Above list of trading groups will be available in Next EUA (P-EUA) and Production environments.

Derivative Markets

The following Exchanges are included in the scope of migration of Oslo Børs instruments to Optiq®:

Exch.	Class Name	Financial Market	Contract Type
L	Oslo - Cash Underlying	309	
N	Oslo - Index Derivatives	308	F (Future) O (option)
O	Oslo - Equity Derivatives	308	F (Future) O (option)

Note: Above list of Exchanges will be available in Next EUA (P-EUA) and Production environments.

7.2 LIST OF INSTRUMENTS IN NEXT EUA

The list of Oslo instruments on Euronext Cash Next EUA and Oslo contracts on Euronext Derivatives Next EUA can be found [here](#).

7.3 LIST OF INDICES

Equity Indices (a list of Data feed names can be found online: [Data feed for Oslo Børs Indices names and historical data for Sectorial Indices](#))
